## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities: Page 7, on line 15, numeral "8" represents an element different than numeral "8" on lines 20, 22 and 27.

Appropriate correction is required.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

### ***Drawings***

The drawings are objected to because numeral "8" of Fig. 1 represents an element different than numeral "8" of Figs. 3 and 4. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

Claims 33, 37, 39, 45, 49 and 55 are objected to because of the following informalities: In claim 33, on line 3, and in claim 49, on line 4, after "circumference", -- thereof -- should be inserted, otherwise "the circumference" recited has no antecedent

basis. In claim 37, on line 3, "the" should be replaced with – an --, otherwise "the axial direction" has no antecedent basis. In claim 39, on lines 2 and 3, the phrase "wherein . . . adjusted" should be replaced with – wherein the connecting elements have adjustable clamping forces --. In claim 45, on lines 3 and 4, "the" should be deleted. In claim 55, on line 2, "a"(first occurrence) should be – the --; and on line 3, "an" should be – the --. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 33 and 49 are rejected under 35 U.S.C. 102(b) as being anticipated by Ahmad et al.

As now worded, independent claims 33 and 49 read on at least Figs. 1 and 3, and the accompanying texts of Ahmad et al.

Regarding the optical subassembly of claim 33 the analysis is as follows (see column 2, line 31 to column 3, line 16): for the mirror element 7 (= elements 8-10) of the claim, see numerals 10 and 12 of the patent; for the mount 13 of the claim, see numerals 18-21 of the patent; for the bearings 12 of the claim, see numerals 22-24 of the patent; for the cutouts 11 of the claim, see numeral 27 of the patent; and for the connecting elements 17 of the claim, see numerals 11, 17, 25 and 26 of the patent. Finally, with respect to the passage of projection beam through the cutouts, since no

criticality is seen from such a passage of the beam, the cutouts 27 of the patent would also provide the passage in question.

For the projection objective in semiconductor lithography of claim 49 (see column 1, lines 14-40, plus the portions indicated above), it is noted, the scope of which is similar to that of claim 33, but somewhat narrower due to the absence of the characteristic associated with the passage of projection beam discussed above.

Therefore, for analysis, see above.

#### **Allowable Subject matter**

Claims 34-48 and 50-57 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
